

AOVASC

AMSTERDAM OPEN VASCULAR COURSE

Enhance your open vascular surgical skills with this unique 2-days hands-on workshop. Course participants will be able to perform complete, skin-to-skin open vascular procedures in a life-like situation. Thanks to a unique preserving method human bodies maintain their flexibility, tissue color and can be perfused. Open surgical and hybrid procedures will be performed in state of the art operating theatres in our brand-new Amsterdam Skills Centre. All procedures will be supervised by a faculty with many years of experience in open vascular surgery.

ENHANCE YOUR OPEN VASCULAR SKILLS

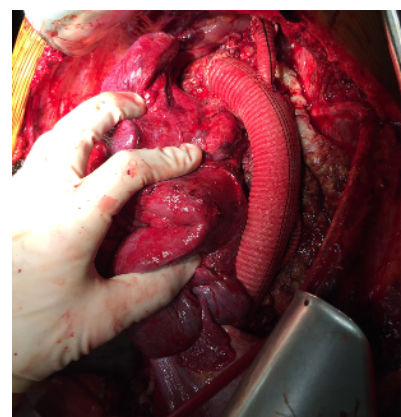

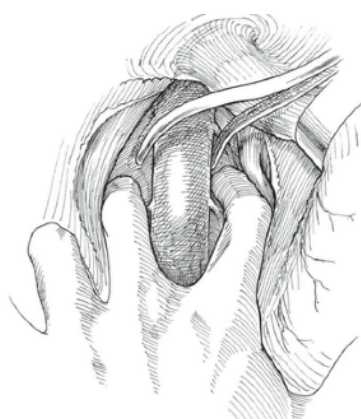

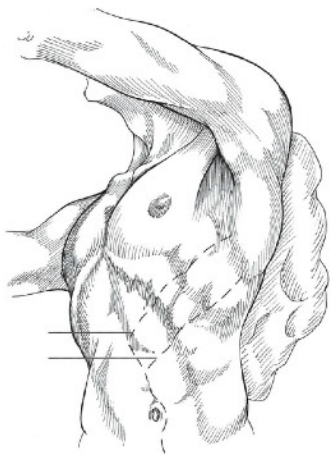

Carotid endarterectomy	Supra-truncal aortic clamping	Obturator bypass
Carotid-subclavian bypass	Left visceral rotation	Lateral approach AFP
Thoracic aortic repair	Infrarenal aortic repair	Crural bypass
Thoraco-abdominal approach	Mesenteric bypass	Retroperitoneal iliac bypass

Monday 17th & Tuesday 18th of June 2019

COURSE INFORMATION

Two full days of hands on training with the guidance of one of our experienced vascular surgeons. After exposing the vasculature, a variety of procedures can be performed, including endarterectomy, bypass grafting, (carotid) shunting and also non-reversed venous bypass using a valvulotome. Exposure of the thoracic aorta and creating your thoracic aortic anastomosis will be part of the course. Both transabdominal and retroperitoneal approaches to the supra- and infrarenal aorta will be reviewed and trained. Furthermore, we will perform perfusion of the great vessels and test your aortic anastomosis for patency and hemostasis. After the first day the organization and sponsors are happy to present you a nice dinner.

FACULTY

Prof. dr. W. Wisselink

Prof. dr. J.D. Blankensteijn

Dr. A.W. Hoksbergen

Drs. H.J. Nederhoed

Dr. M. Truijers

COURSE FEE

Thanks to our partners this course can be organized with a reduced fee of € 1500.
